-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 8-34 are, drawn to a pharmaceutical composition comprising levodopa methyl ester and carbidopa monohydrate, and an acid-base couple administering as a single oral dose to a human, classified in class 424, subclass 466.
 - II. Claims 35-48 are, drawn to a method of providing levodopa methyl ester and carbidopa monohydrate and an acid-base couple, administering as a single dose to a human, classified in class 424, subclass 466
 - III. Claims 49-53 are, drawn to a method of providing levodopa methyl ester and carbidopa and acid-base couple to a human and said method comprising orally administering as a first and second dose compositions, classified in class 424, subclass 466.

The inventions are distinct, each from the other because of the following reasons:

Inventions 1, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions group I related to a pharmaceutical composition comprising active agent and acid-base couple and group II related to method of treatment involving single dose of said pharmaceutical composition and group III related to method of treatment

Art Unit: 1618

involving two doses of said pharmaceutical compositions, specifically second levodopa composition is the same in all respects as said first composition except that it does not contain said acid-base couple, which change the composition, function and utility of the respective therapeutic agent (see US 4,814,183; Neurology, Vol 37(2), 233-241, 1987; Neurology, Vol 37(10) 1607-1612, 1987 and J. Pediatr Ophthalmol Strabismus, 32, 143-151, 1995).

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jagadishwar R. Samala whose telephone number is (571)272-9927. The examiner can normally be reached on 8.30 A.M to 5.00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Hartley can be reached on (571)272-0616. The fax phone
